

Vendor of modern Enterprise IT solutions, part of the ITG corporation

ITPOD Storage data storage systems

Advanced storage systems
for your digital future

Full Flash

Ultra performance
with minimal latency

Hybrid

Universal storage systems
for any type of task

Advantages of ITPOD Storage

- The best performance to the highest standards
- No legacy technologies
- A team of professionals with many years of experience in operation and development
- For Enterprises & SMBs

Functional features

- End-to-End NVMe support
- Simple integration (supports VMware, Linux, Windows, FreeBSD)
- Thin Provisioning
- Snapshots
- Inline deduplication
- Inline compression
- RAID-Z (2,3) – reliable data protection levels
- TRIM (Deallocate) support
- QoS – workload control and priority distribution
- Integrated monitoring system
- Security
- Ease of maintenance
- Enterprise Support

Ethernet Network

ITPOD Server Solutions

Servers support OS

- Microsoft Windows Server
- CentOS
- Red Hat Enterprise Linux
- Ubuntu
- SUSE
- FreeBSD

AI/ML Computing

High-performance computing and AI

Vault

Computing, storage, and processing large volumes of data

General Computing

Universal servers to support a wide range of software

Network Appliance

Optimising SDN and DPI solutions in the telecom industry

ITPOD specialists will help design a custom architecture for your needs, select optimal server configurations, and calculate requirements for energy efficiency and fault tolerance.
